Co-lead global fintech think tank
organization called GIFT.

Alok Kabra
CFO

CA
Ex-CFO Pantomath Group
15+ yrs of expertise in Taxation, Audits,
Finance & Wealth Management.

Problems We Solve

Real Estate Remains Exclusive

High Entry Barriers

Traditional real estate requires significant capital, often ₹50 lakhs+ for entry-level investments

Poor Liquidity

Assets locked for years with complex exit processes and limited secondary markets

Legal Complexity

Existing fractional models rely on SPV structures with indirect ownership rights

Lack of Transparency

Opaque processes with limited visibility into asset performance and management

Our Solution: Blockchain-Powered Fractional Ownership

Two Ownership Models

- **Registered Co-Ownership (RCO)**
Direct legal co-ownership rights established through Registered Deed
- **Property Tokens**
NFT containing legal note establishing Secure Direct Rights on Property

Starting from just ₹50,000 investors gain access to high quality real estate making it #Affordable #Accessible & #Digital for EVERYONE.

What's Unique: Legal Model Innovation

Direct Co-ownership rights over Property

- **Competitors**

While all other fractional companies use SPV model which was a work around to execute fractional ownership which can impacts the investor returns.

- **RealX**

RealX established Direct Co-ownership right over property thereby eliminating need to establish and SPV for every transaction.

We are the only company that is working on this model and we have executed multiple Million dollar transactions to prove the model.

Business Model

Platform Fees

1% on every property token sale or RCO subscription providing immediate transaction-based revenue

Exit Fees

5-10% of total profits at exit, percentage from rental returns ensuring long-term alignment

Rent Processing Fees

The rent generated from the asset will be distributed among investors after deducting 3-5% of RealX fees.

Developer Partnerships

Annual fees for exclusive arrangements with **1%** platform fees on all transactions

The Future of Asset Ownership
